

With the superior look and feel of glass, Laminex Metaline Splashbacks provide a heat and water resistant vertical panel option that is fire retardant for use in kitchens behind gas and electric cooktops. They are also ideal for wet area wall linings such as laundries and bathrooms.

Metaline is easy to clean with a highly durable clear coating surface overlaid on a range of twelve stunning high gloss paint colour options making them the clear choice for head-turning splashbacks in the kitchen

Metaline is a quicker and easier to install alternative to glass and tiles.

Laminex Metaline Splashbacks can be measured, fabricated and installed by an accredited cabinetmaker or joiner in just a few hours.

Laminex Metaline Splashbacks are crafted using advanced fire retardant aluminium composite panels, independently certified by SAI Global under the CodeMark compliance scheme as conforming to Building Code of Australia standards for domestic cooktop splashbacks, making them the perfect splashback solution for areas with an emphasis on style.

For further information and to see Laminex Metaline Splashbacks on display, visit The Laminex Group Showroom at 163 Currie Street, Adelaide, call 132136 or go to www.laminex.com.au
